

# AIRBNB

## IDEA & CONCEPT

When my client told me, his Airbnb Apartment should be something special, luxurious and sophisticated, It turned out to this one bed-room "limited edition" on a small budget.

As a result, the customized and high-end furniture are kept in elegant lines within a neutral color palette from very light to very dark. The colors are served as a thread to hold all the elements of furnishing together, create accents and giving it an irresistible touch.

Through organization and the correct arrangement of the furniture, I ensured that the different components of all pieces are perfectly balanced and functional. An open living, dining and kitchen area helps to encouraging free airflow while well chosen materials and textiles creating harmony for this aesthetically pleasing design project.
